

Abdul Wahed Nur

Full-Stack Developer (Django + Next.js) · eCommerce & Business Applications

Sherpur, Mymensingh · wahednur@gmail.com · +88 01917 839303 · wahednur.tech · github.com/wahednur · linkedin.com/in/wahednur

SUMMARY

Full-stack developer who builds web applications around real business workflows: storefront, admin panel, payments, inventory and reports. Main stack is Django REST Framework, PostgreSQL, Redis/Celery and Next.js/React with TypeScript. Building and running a live eCommerce platform for my own business, and built a parts-and-service management system for motorcycle service businesses. Earlier background in VFX, animation and graphics.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, SimpleJWT, Celery, REST API design

Databases: PostgreSQL, Redis, MongoDB

Frontend: React, Next.js, TypeScript, Tailwind CSS, shadcn/ui, Vite, TanStack Router/Query/Table, Recharts

Also used: Node.js, Express, Mongoose (MERN), Firebase Auth, Flutter

Integrations: SSLCommerz payment gateway, Steadfast courier API

Tools: Git, Docker, Docker Compose, Linux (WSL2), Postman, VPS deployment with Dokploy, Cloudflare

PROJECTS

ekhaneikini.com — eCommerce Platform

Own business · live

Django REST Framework, PostgreSQL, Redis, Celery, Next.js, React + Vite, Flutter

- Built the backend API, customer storefront, admin dashboard and an offline-first mobile order app.
- Built a catalog with nested categories, product variants (color, size) and reusable product-type specification templates.
- Implemented cart, guest checkout, Cash on Delivery and SSLCommerz online payment (verified in sandbox) with payment retry.
- Built an order status workflow with Steadfast courier consignments, returns, reporting and a customer CRM.
- Built an inventory ledger where every stock change is a recorded movement, plus permission-based access (no hardcoded roles) and restricted buying prices.

Motorcycle Service & Parts Management System

nurain.vercel.app · live

Django REST Framework, PostgreSQL, Next.js, shadcn/ui

- Built a service invoicing workflow supporting accumulated repair entries, partial payments and customer balance tracking.
- Built customer/supplier ledgers, parts inventory, expense and cashbook, and profit/loss reports; recorded meter model, serial and kilometer readings per job.

Education Management System — UI Demo

lms.wahednur.tech · demo, sample data

- Built a frontend and admin demo with sample data for a government educational institution, at the request of its staff. Not a production system.

EXPERIENCE

Founder & Full-Stack Developer (self-employed)

Jan 2020 – Present

- Project management, customer handling and full-stack development for own products and client work. See Projects.

Software Developer (product & requirements), Bedoon Essm Co., Saudi Arabia
